IMPLANT CLINIC

OBJECTIVES:

1. To provide prosthetic rehabilitation for patients with missing teeth with the aid of dental implants.
2. To render a wholistic periodontal, surgical as well as prosthetic scaffold for a successful replacement of missing dentition.

SIGNIFICANCE:

- The post-graduate residents of the departments of Periodontics, Prosthodontics and Oral and Maxillofacial surgery have been trained to specialize in implantology which has seen a rising demand in the field of dental care.

INFRASTRUCTURE:

- The clinic is furnished with multiple dental chairs, superior quality implant surgical kits, compatible physiological irrigation system and an in built RVG system for a high standard treatment.
- The clinic is provisioned with adequate number of well-maintained and sterilized sets of diagnostic and therapeutic instruments.

IMPLEMENTATIONS:

- The Implant clinic has been appointed with highly experience and well-trained Implantologists.

- Post-graduate students of the departments of Periodontics, Prosthodontics and Oral and Maxillofacial surgery are being exposed and trained to the curriculum of implantology since the start of their post graduate program.
- Weekly case presentations and conceptual classes are held for the post-graduate students for enhancing the diagnostic and treatment planning capability of the residents.

VALIDATION :

- There has been an increased demand for implant based prosthetic rehabilitation among the patients.
- The students have been educating the patients on the possible implant based prosthetic options for replacement that has raised the patient's awareness on more advanced dental care.
- A well systematic maintenance of patients records inclusive of pre and post-operative photographs, models and radiographs is done.
