## SEMINAR ON OCCLUSION AND ITS IMPORTANCE

Venue: Gallery-1

No.of students attended:12

Faculty: Dr.Sumeet sharma, Professor

Date: 14/3/20

Phone no. 9000790000

Summary:

A seminar was conducted on occlusion and its importance by Dr.Sumeet sharma, Professor in department of prosthodontics. Occlusion is the most important step in complete denture. Selection of the teeth and arrangement of teeth , alignment are the most important aspects in the complete denture prosthesis. Recording the jaw relations and teeth arrangement should be proper so that the masticatory forces are not affected. Students have been educated on the occlusion and importance of jaw relations

## WORKSHOP ON TEETH ARRANGEMENT

Venue: Dept of Prosthodontics

No.of students attended: 15

Faculty: Dr.Bhanu Chandar, Assistant professor

Date: 2/3/20

Phone no.9505417477

### Summary:

Teeth arrangement is the crucial step in a Complete Denture. The occlusion and the masticatory forces are interlinked. One should record the jaw relations of the patient properly so that the masticatory forces will not affect the denture.

Occlusion of the patient depends on the teeth arrangement. Students should know about the jaw relations and teeth arrangement in accordance to deliver a complete denture without any faults.

## SEMINAR ON CBCT

Venue: Lecture Gallery -1

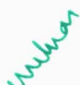

No.of students attended:15

Faculty: Dr.Aravindan Karunakaran, Associate Professor Date:22/2/20

Phone no.9840669964

Summary:

A seminar was conducted by Dr.Suma latha professor oral medicine and radiology department. Radiology is important in the diagnostic assessment of the dental patient. 3D diagnostic imaging of the jaws has been of interest since introduction of CT as a clinical tool. Because of relatively high cost, high dose, and availability limited to hospitals and medical radiology practices, use of this technology in dentistry has been limited. Students have been educated on the importance of the CBCT and uses of the CBCT.

VENUE: Lecture Gallery-1

No.of students attended:20

Faculty: Dr. Subha Deshpande, Associate Professor

Date: 12/2/20

Phone no.9741452262

Summary:

Specific diseases are frequently brought on by colonisation and biofilm growth on dental materials and denture surfaces. The analysis focused on two primary strategies: the first one involves a permanent change, frequently including quaternary ammonium salts, and the second one involves the temporary induction of an antimicrobial/antibiofilm characteristic through the use of drug delivery methods. To ensure antibacterial and antibiofilm qualities for the most popular dental materials, such as methacrylate-based materials, polydimethylsiloxane, and others, several chemical agents (chlorhexidine, miconazole, natural agents, antibiotics, etc.) were investigated in vitro or in vivo. Ceramics have the lowest adhesive capability of the common dental materials because of their inert surface. Zirconia dental ceramics, for example, exhibit poorer adhesion than metals or even genuine teeth, according to a number of research.

## SEMINAR ON RESEARCH METHODOLOGY

VENUE: Gallery-1

No.of students attended:15

Faculty: Dr.Sanjeev Anand, Associate Professor

Date:10/01/20

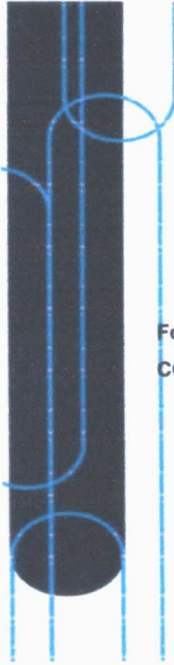

Phone no.8897731442

### Summary:

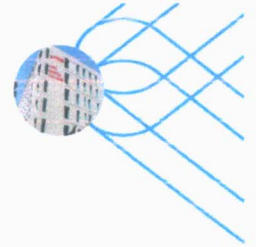

The curriculum mainly concentrated on field studies, clinical/experimental research, and study on literacy. The types and goals of study were fully explained. The components and approaches for each sort of research were thoroughly discussed to the dental students in their first year. The training also covered how to follow and formulate research criteria for ICMR, WHO, and other organisations. The session concluded with a discussion of biosafety issues in dentistry research, including hood lab procedures, scientific objectivity, a code of conduct, and plagiarism. The emphasis on how to paraphrase the research's material in order to eliminate plagiarism was eventually brought up when the topic of plagiarism came up.

## **WORKSHOP ON RESORBED RIDGES**

Venue: Department of prosthodontics

No.of students attended:10

Faculty: Dr.Lakshmi Sailaja, Assistant Professor

Date: 9/09/19

Phone no. 9550224402

Summary:

A workshop was conducted on resorbed ridges by Dr.Lakshmi Sailaja Assistant Professor, Department of prosthodontics. This helps in gaining sound knowledge on impression making and different techniques in managing resorbed ridges which helps in guiding the students on it in the clinical practice. A thorough history, a keen eye in clinical examinations and sound knowledge about the possible treatment alternatives will help the prosthodontist to provide his patients with satisfactory complete denture prosthesis.

## SEMINAR ON BIO-FILM

Venue: Lecture Gallery-1

No.of students attended: 7

Faculty: Dr.Sumathi, Professor

Date: 03/08/19

Phone no.9444463322

Summary:

A lecture was taken on Biofilm by Dr.Sumathi, Professor and head Department of oral and maxillofacial pathology. A biofilm is an assemblage of surface associated microbial cells that is enclosed in an extracellular polymeric substance matrix.

Antony van leeuwenhoek, using his microscopes, first observed microorganisms on tooth surfaces. Biofilms include bacteria, fungi and protists. One common example of a biofilm is dental plaque, which is a slimy buildup of bacteria that forms on the surfaces of teeth. Students were educated on how the biofilms form and why?. Its importance in the health and disease were explained.

## **SEMINAR ON RESEARCH STRATEGIES**

VENUE: Gallery-1

No.of students attended:10

Faculty: Dr.V.Shiva kumar, Professor

Date:10/07/19

Phone no.9283241104

Summary:

Field studies, clinical/experimental research, and literacy studies were the core foci of the programme. The first year of dentistry school included a thorough discussion of the elements and methodologies for each type of research. How to follow and create research criteria for the ICMR, WHO, and other organisations were also discussed in the workshop. The discussion of biosafety issues in dental research, such as hood lab practises, scientific objectivity, a code of conduct, and plagiarism, marked the session's conclusion. When the subject of plagiarism eventually came up, the emphasis was on how to paraphrase the research's material in order to eliminate plagiarism.
